2022 AeroTek Manufacturing Ltd's Total Quality Policy

AeroTek's 2022 Total Quality Policy is focused on the continuous improvement of company operations, systems and thinking to better satisfy interested parties needs based on the Context of the Organization methodology. Continual improvement will be accomplished by adopting ISO 9001, AS 9100 Rev D quality management systems (QMS) and the NCA-3800 quality system program and their respective philosophies, while embracing NADCAP guidelines for processing.

Quality Objectives provide timely analysis of AeroTek's performance in meeting internal and external expectations of interested parties, employee testing and training plans are used to identify and provide each employee with the skills required to meet and exceed the requirements of their functional duties and personal goals.

Effective allocation of resources through development and implementation of best practices methodologies and technologies will be the tools used to accomplish the company's policy goals.

J. Schofield
