

## ***AeroTek is ITAR & CGP Compliant***

### ***ITAR***

The International Traffic in Arms Regulation, also known as ITAR, are United States government regulations that control the manufacturing and exporting activities of defense services. ITAR regulations dictate that information and material pertaining to defense and military-related technologies (for items listed on the U.S. Munitions List) may only be shared with U.S. persons authorized by the Department of State. ITAR compliant means that you are cleared for sharing information on products listed on the U.S. Munitions List.

### ***CGP***

The Controlled Goods Program (CGP) regulates businesses and individuals who examine, possess and/or transfer controlled goods, including ITAR items, in Canada. The United States government officially recognizes CGP as a Canadian equivalent program to ITAR. Because AeroTek is CGP-certified, U.S. companies can share ITAR-restricted information with CGP-cleared AeroTek employees.

As an ITAR- and CGP-compliant company, AeroTek strictly adheres to the required rules and regulations for each program:

- All AeroTek employees receive training on ITAR policies.
- All meetings on an ITAR project are screened for authorized personnel.
- CGP-cleared employees are granted access to ITAR-related data on a project-by-project basis.
- ITAR projects have secured file and documentation locations and are only accessible by authorized employees.

Contact AeroTek for more details about our compliance with ITAR and CGP.
